

# Professional Fish Tapes

For Pulling Cables & Wires in Wall Embedded Conduits

## Description

Professional fish tapes for pulling cables & wires such as electric, audio-visual, CATV, telephone, datacom in new or populated conduits embedded in walls, ceilings & floors. Salient features common to products featured below are:

- Based on 3.0 mm dia composite fiberglass rod.
- Composite fiberglass rod is non-conductive & safer to use.
- Enables easy pulling of wires in conduit and FAST. The fiberglass rod tracks in straight lines down conduits.
- Ideal for direct pulls of 20m & above.
- The glass rod is highly resilient to bending and shearing stresses, allowing it to turn in small radiuses.

## GLASSJACK

### Features
